

CLEANING MANAGEMENT SYSTEM

#6 Tile and Grout Cleaner is designed to be used with the Cleanworks® Cleaning Management System. The system dispenses precisely diluted cleaner with the touch of a button...ready to work in spray, wipe-on or mop-on applications. Highly concentrated formula saves storage space and helps reduce disposal costs. Cleanworks® is simple, accurate and safer to use.

The cleanworks® Cleaning Management System is subject of U.S. Patents No. 5037003, 5083677, & 5228598

6 TILE AND GROUT CLEANER

Why it's a better cleaner

- The Cleanworks® System dispenses it right...every time.
- Unique acid blend - Easily dissolves soil on grout lines
 - Removes alkalinity, soap film, and grime - Makes surfaces clean and less slippery
 - Non abrasive - Won't dull surfaces
 - Cleans concrete and quarry tile floors - Restores floor to original condition
 - Water based - Nonflammable, noncorrosive

How it cleans

Dispense precisely diluted cleaner into a clean, empty container. If solution is for reuse, properly label RTU container.

Remove gross soils and debris.

Liberally apply by mop, sponge, or spray onto surface to be cleaned. Scrub if soil is heavy. Rinse with water thoroughly. Replace solution when it becomes visibly dirty. (Pretest surfaces for colorfastness.

Not recommended for wood, aluminum, or glass surfaces.)

Dispense 180 quarts or 45 gallons of ready-to-use cleaner from the 1.25 gallon concentrate of Cleanworks® #6 Tile and Grout Cleaner.

Where it cleans

- Ceramic tile
- Glazed porcelain
- Stainless steel
- Chrome
- Slate
- Quarry tile
- Shower and shower doors
- Floors and walls
- Sinks and tubs
- Kitchens
